

**FACULTY MENTOR**

Camille Nebeker

**PROJECT TITLE**

Technologies for Older Adults

**PROJECT DESCRIPTION**

This project will involve the application of natural language processing to a corpus of 100 90-minute 1 on 1 interviews with people over 65 years of age. The interview questions focus on perceptions of technology to support aging independently as well as issues of loneliness, social supports, wisdom and quality of life. The use of NLP with these data will offer an alternative to traditional qualitative methods presently used.

**INTERNS NEEDED**

1 MS student

**PREREQUISITES**

Experience and coursework in NLP
