

**FACULTY MENTOR**

Elizabeth Twamley

**PROJECT TITLE**

CogSMART app

**PROJECT DESCRIPTION**

I have a web-based cognitive training app called CogSMART. I currently need to set up accounts for people to be able to use the app. I would like people to be able to sign up for an account online by themselves. I would also like to see what type of data I can get from the app regarding user behavior (e.g., how long do people spend on each module).

**INTERNS NEEDED**

Negotiable
