

FACULTY MENTOR

Rick Gessner

PROJECT TITLE

Utilizing Machine Learning to Enhance a Social Learning Platform

PROJECT DESCRIPTION

Description: Our goal is to develop methods of using automated machine learning to enhance an online learning environment to help students identify learning weaknesses, discover new resources that augment or enhance existing learning curriculum, and improve student learning outcomes.

This project can accommodate both remote and in-person students.

INTERNS NEEDED

2 Students

PREREQUISITES

- 1. Working knowledge of the development of ML models.
- 2. Experience using ML libraries in Python.
- 3. Some distributed computing (web) skill helpful, but not required.
