

FACULTY MENTOR

Hanh-Phuc Le

PROJECT TITLE

Integrated Power Supply For Soft Robotics

PROJECT DESCRIPTION

Description: In this project, students will explore power electronics and/or integrated power electronics for a future submergible soft robot systems.

This project will be in person.

INTERNS NEEDED

2 Students

PREREQUISITES

1. Interests and experiences in hands-on hardware, PCB design, integrated circuit designs, integrated power electronics. The list is in the increasing order of specifics. You don't have to have all of them, but the more you can claim your experience and background toward the last items the higher chance you will get this position.
